

Homework #04

See course website for due date.

Directions:

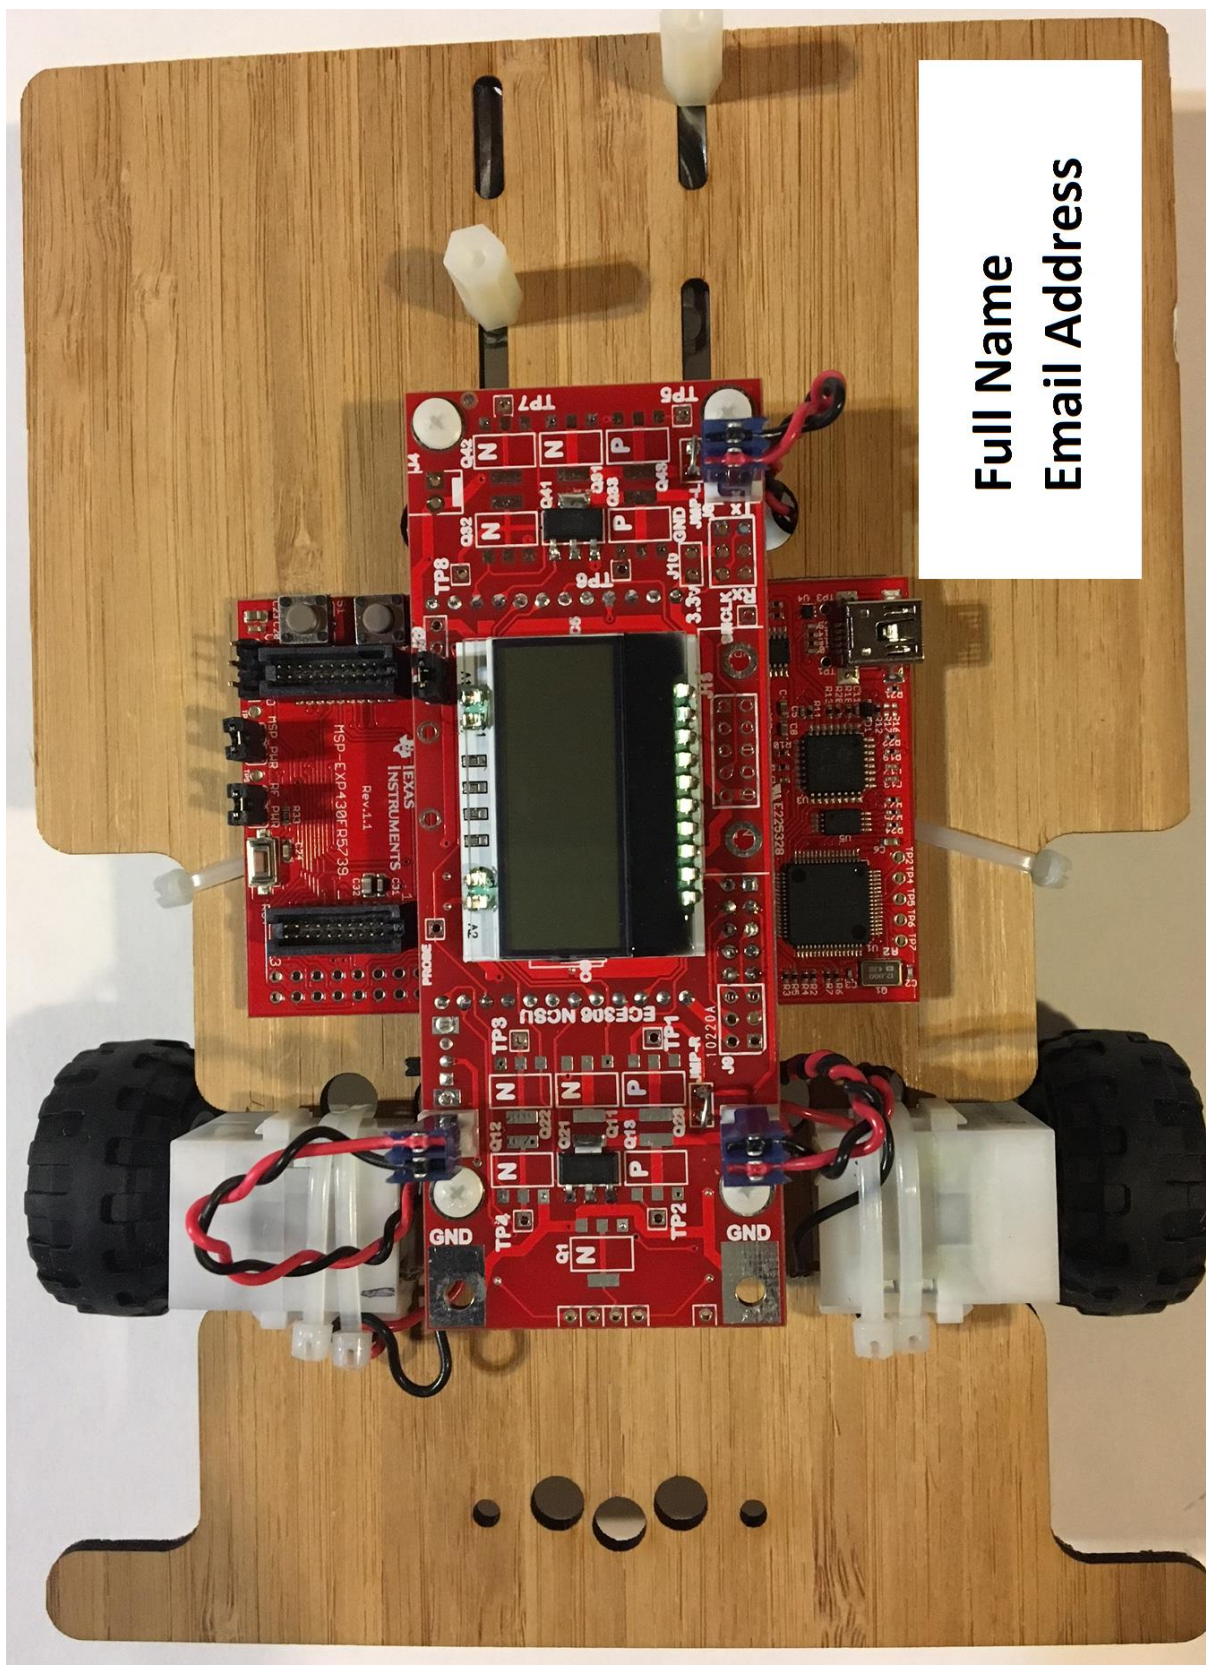

Please submit this homework using Moodle.

For Homework, you need to take a series of *clear (ie – not blurry)* close up photos of your vehicles. The cars should be the subject of the picture (a close up of it, not one taken from more than a foot or so away.) You need to take a photo looking down from the top of the car, a photo looking from the side and a photo from front. If your label is not visible clearly, edit the photo to add your name and email address to the photo. All three photos are to be inserted into a **Power Point slide** presentation. Each page will contain a picture. The first page should contain the top picture, second page side picture and third page the front picture. Each page should contain your name in the title area.

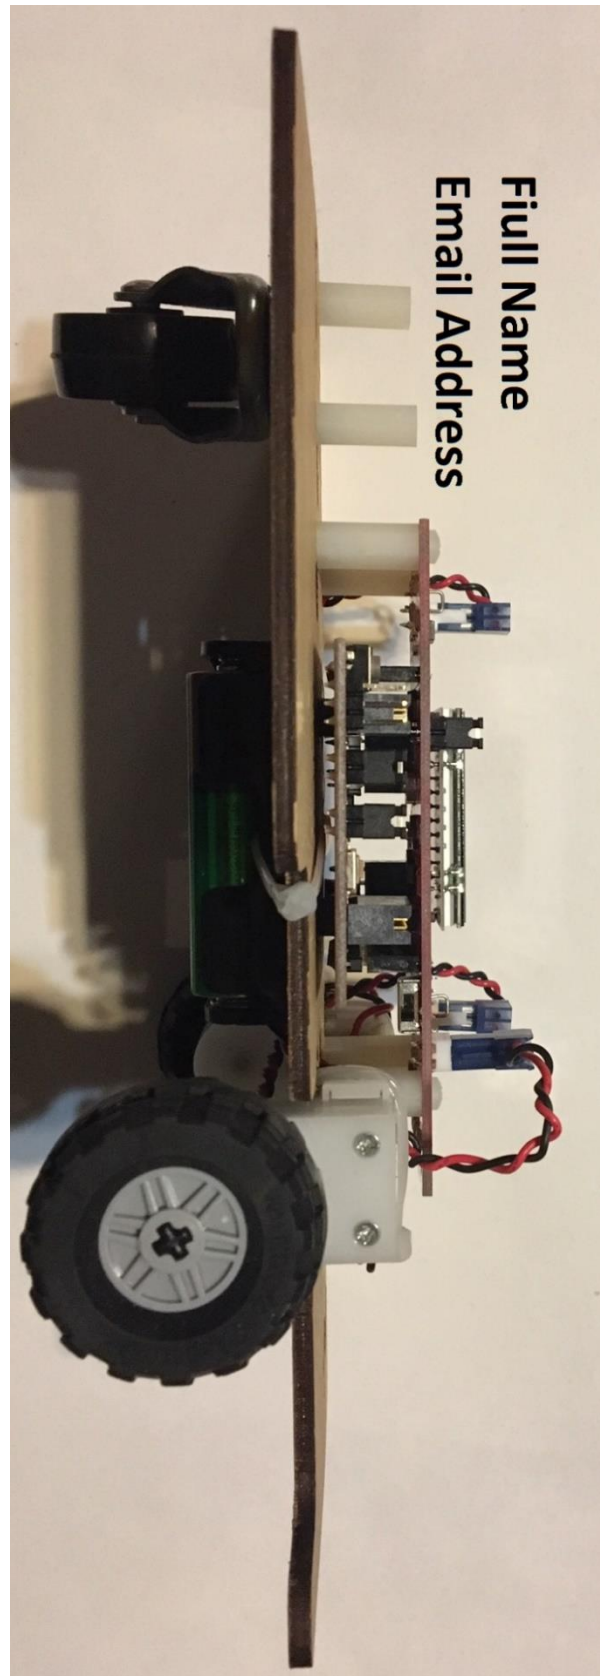

The file name is to be Lastname.pptx

Your vehicles must have your label, and team number when the photos are taken.

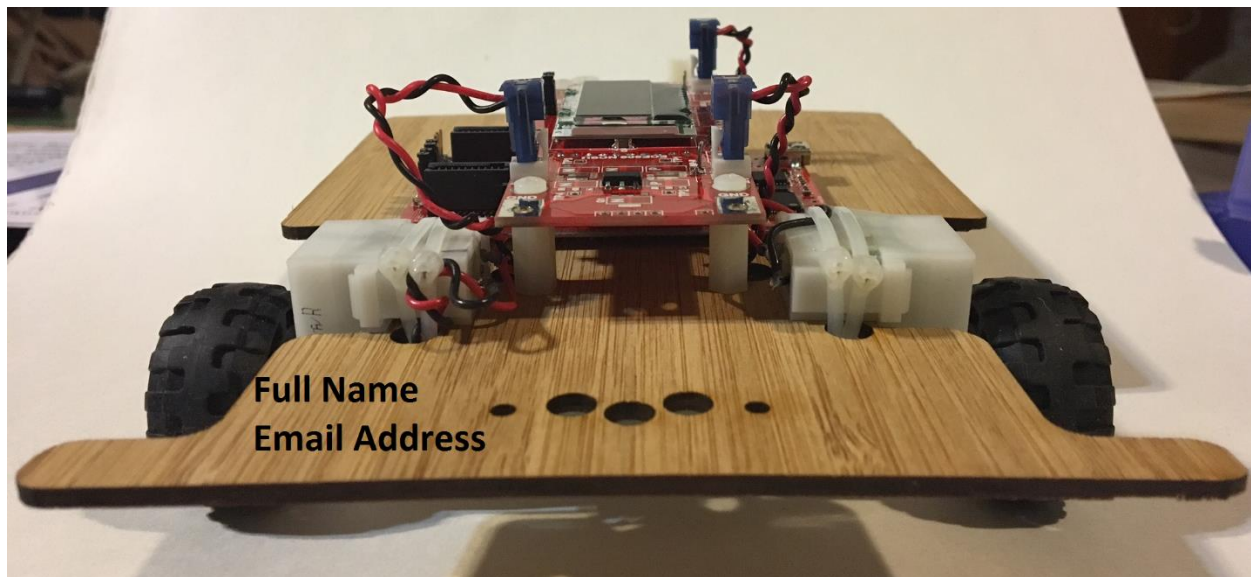

The following images show you the resolution required.
